

Technical Information

HIGH PERFORMANCE Marine Protection Coating

Product information

AUTOSOL® HP Marine Protection Coating is specially designed for the sealing and protecting all painted & fibreglass gelcoat surfaces. AUTOSOL® HP Marine Protection Coating will slow the ability of environmental influences like algae from forming by sealing the surface with a thin protective layer that acts as a barrier. The high tech nanoparticles and strong hydrophobic polymers infused in modern synthetic sealant boost the gloss and extends the life of the surface. Once sealed, the surface is hydrophobic, so it will repel rain and sea water to help reduce salt residues. AUTOSOL® HP Marine Protection Coating makes the ongoing cleaning of salt spots, stains and water marks easier.

- Boosts and protects gloss
- Repels water
- Reduces algae
- UV protection

Application

Shake bottle well before use. Apply a small amount of the product to a clean cotton cloth or sponge and apply by hand in a circular motion. Work in different directions to ensure good coverage. Insure that you apply a thin layer to avoid over application and haze. Work a section at a time until the surface dries. Remove wax residue with a clean cloth.

Note

Do not apply to a hot surface or in bright sunlight.

Technical Data

Form: fluid
Colour: white
Odour: characteristic

Health and Safety

Safety Data Sheet is available separately.

Additional Information

Art.-No.: 11 053200

bottle 1L

PU: 6
