

AUTOSOL® Anodized Aluminum Polish

Product information

Anodizing builds up the oxide layer of aluminum. The oxide layer is an excellent protective coating against corrosion and wear. It is not advisable to use normal metal polishes because the containing abrasives can damage the oxide layer. AUTOSOL® Anodized Aluminum Polish is an especially developed and very effective cleaning polish whose soft polishing particles do not damage the oxide layer. It works on all kinds of anodized aluminum including colored parts of motor-bikes or cars.

Application areas

All kinds of anodized aluminum i.e. window frames, parts of motor-bikes, parts of car bodies etc.

How to use

Apply AUTOSOL® Anodized Aluminum Polish to the part that is to be cleaned and polish with a soft cloth, using circular movements. Allow a moment for cleaner to take effect and wipe with a damp cloth.

Do not use on hot surfaces. Avoid freezing.
