

Technical Information

AUTOSOL® Wheel Cleaner High Performance

Product information

The AUTOSOL® Wheel Cleaner High Performance based on high-performance active agents; effortlessly removes stubborn dirt and grime from steel and alloy wheels, for example brake dust, oil and rubber residue and other street dirt. It will also remove rust particles that usually can only be removed by acid-based cleaners. AUTOSOL®'s Wheel Cleaner High Performance is acid free and will not mark wheels, brake callipers and locking bolts like some acid base cleaners can.

Application

Spray from an approximate distance of 15-20 cm onto the surface; allow settling for 3-5 minutes. As the cleaner starts to activate and lift the dirt, the colour will change from green to dark purple, the residue can now be removed with a high pressure water jet or cleaner. To assist with the removal of stubborn dirt use a wheel brush.

before application

fresh applied

colour change while residence time

after rinsing

Note

Do not use in bright sunlight or on hot wheels. Do not allow to dry.

Technical Data

Form: liquid
Colour: light green
Odour: characteristic

Health and Safety

Safety Data Sheet is available separately.

Additional Information

Art.-No.: 11 012650

spray bottle 500 ml

PU 12
